

Greg Waldstreicher is an entrepreneur and technologist focused on building companies that make complex problems easier to solve. He earned a Bachelor of Science in Accounting from the University of Maryland and a Master of Science in Technological Entrepreneurship from Northeastern University. Greg co-founded DoseSpot, an electronic prescribing platform trusted by more than 200,000 healthcare providers. He later founded Botable, an AI company helping employees quickly find and understand workplace policies and procedures. In his free time, you can find Greg with his wife and three boys, running on the Peloton Tread, and giving back to his community by volunteering with several Connecticut-based organizations.
